Objectives

To pursue a challenging career in a dynamic organization where I can enhance my knowledge and skills. My goal is to contribute to the growth and success of the company through dedication, creativity, and a strong work ethic. I am eager to take on new responsibilities, collaborate with talented professionals, and continuously improve myself to drive the organization forward.

Experience

Software Developer, T Cube The Think Tank solutions - Chennai June 2023 - Present

- The product of the company focuses on ERP, which reduces human work a lot to run an enterprise.
- Designed and developed a comprehensive ERP system, integrating key business modules including CRM, BOM, MRP, Finance, Accounting, Reports, Call for Bids, Procurement, and Dashboard.
- Implemented a "Call for Bids" auction module within the ERP system, enabling efficient management and selection of vendors for projects through streamlined bidding processes.
- Led the implementation of features that streamlined business processes, reducing manual work and improving overall efficiency across the enterprise.
- Collaborated closely with cross-functional teams to ensure seamless integration and functionality of various modules.
- Utilized advanced SQL database migrations to enhance data management and integrity.
- Engaged in frontend UI development to create user-friendly interfaces and improve user experience.
- Applied best practices in software development to deliver high-quality, maintainable code.
- Conducted regular testing and debugging to ensure optimal performance and reliability of the ERP system.

Software Developer, Intern, T Cube The Think Tank solutions - Chennai Jan 2023 – Apr 2023 4 Mos

- Started with a small warm-up project: a simple Hospital Management System (HMS) with basic CRUD operations.
- Successfully completed a project named "PROJECT MANAGEMENT".
- Aimed to build a single codebase for managing various industry projects within an ERP system.
- Used Laravel, PHP, Bootstrap 3, JavaScript, jQuery, and MySQL for development.
- Designed the system to be scalable and flexible, catering to different project management needs.

Skills

Back-end: PHP, PHP Laravel, MVC, OOP, C Programming

Front-end: HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, jQuery, Ajax, Vue, Responsive Design

Databases: MySQL, SQL, Database Migration

Frameworks and Libraries: Laravel, Bootstrap, Tailwind CSS, Vue, jQuery

Testing and Quality: Unit Testing, Debugging

Education

Narasu's Sarathy Institute of Technology, BE- Computer Science and Engineering 2019 - 2023

- CGPA: 8.3/10

Government Higher Secondary School, Dharmapuri., Higher Secondary – 12th 2018 - 2019

- Percentage: 64.5

Government Higher Secondary School, Dharmapuri., Secondary School - 10th 2016 - 2017

- Percentage: 89.8

Certifications

Software Developer - Intern , T Cube The Think Tank solutions 2023

- Completed a software developer internship, gaining hands-on experience in coding, debugging, and collaborating on real-world projects.

My SQL Basics , Great Learning 2023

- Basic commands in My SQL for data analytics.

OOPS in Java , Great Learning 2023

- I've gained a solid understanding of the fundamental concepts of Java, including object-oriented programming.

Basic Python , • Learn O Academy 2022

- I Completed Certification Course Python Programming language Basics in Learn O Academy

Projects

Hospital Management: Monitoring Patient Medical Records Nav 22 - Dec 22

- Integrated Medical Records System: The system allows for comprehensive tracking and management of patient medical records, including history, treatments, and test results, all accessible from a centralized platform.
- Enhanced Data Security and Accessibility: Utilizing HTML, CSS, Laravel (PHP), and MySQL ensures that patient data is securely stored and easily retrievable by authorized medical staff, improving overall efficiency in patient care.

Project Management Jan 23 - April 23

- Built a resource allocation module to monitor manpower distribution and track project milestones, ensuring teams stayed within scope and schedule.
- Integrated budget management features allowing administrators to monitor expenditures in real time and flag cost overruns early.
- Designed a clean dashboard interface using HTML, CSS, and PHP Laravel to provide project stakeholders with clear visibility into resource and budget status.

Call for Bids Auction May 23 - July 23

- Streamlined Bidding Process: The system has significantly reduced the time required to complete the bidding process by automating the steps and providing a structured platform for bid submissions and evaluations.
- Increased Accuracy: The automated system minimizes errors and improves the accuracy of bid evaluations compared to manual processes, leading to better decision-making and fairer outcomes in the auction process.

Enterprise Resource Planning (ERP) System May 23 - Present

- Contributed to the development of a full-scale ERP system spanning multiple business modules including CRM, BOM, MRP, Procurement, Finance, Accounting, and Dashboard.
- Developed the Call for Bids and Procurement modules, streamlining vendor management and purchase order workflows across the organization.
- Built Finance, Accounting, and Reports modules to support real-time financial tracking, automated reporting, and data-driven decision-making.
- Implemented CRM and MRP features to manage customer relationships and optimize material planning across production and supply chain operations.
